

I build AI that *runs the work.*

AI AUTOMATION Autonomous agents, LLM pipelines and self-hosted models, shipped to production and running around the clock. Every system ships with its own proof.

01 · READ

Live signals in

News, markets, web pages, your data and APIs.

02 · DECIDE

AI agents reason

They debate, measure and check every claim.

03 · ACT

Work gets done

Decisions, code fixes, reports and live sites.

10,108^x

faster data hop with THE CORE, my Rust engine

70^B

parameter model running privately on my own server

75k

trading rules invented and tested by AI every day

114 → 0

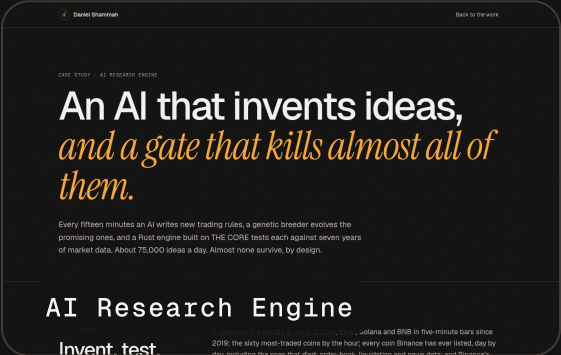

design findings fixed by UXAI, my AI design engineer

385

automated tests behind UXAI's six phases

12

live news and macro APIs feeding the agents

Designed and audited with UXAI

Let's automate
your workflow.
